PLANT NAME	MOISTURE	EXPOSURE	HEIGHT	PLANT CHARACTERISTICS
<b>DOUGLAS FIR</b> <i>(Pseudotsuga menziesii)</i>			120'	Young trees are fast growing, pyramidal, and densely branched. Excellent tree for wildlife gardens.
<b>Blue Elderberry</b> <i>(Sambucus nigra caerulea)</i>			10-30'	Deciduous shrub/small tree, multi-stemmed. Grows up to 18' across. Tiny, creamy flowers in late spring to mid-summer. Edible, dark blue berries. Fairly drought tolerant. Good for wildlife and butterflies.
<b>BIG LEAF MAPLE</b> <i>(Acer macrophyllum)</i>			100'	Large, deciduous tree. Grows in moist, rich humus soils. Leaves up to 1ft across. The bark supports many mosses, lichens, and other plants. Flowers are hanging cylindrical clusters appearing w/ or before leaves. Paired, winged seeds. Attracts birds, bees, insects, and many others.
<b>Pacific Ninebark</b> <i>(Physocarpus capitatus)</i>			13'	Grows in moist, nutrient and mineral rich soil. Erect to spreading shrub up to 13 ft. tall with dark green leaves and clusters of small white flowers in May/June. Brown, shredding bark. Reddish bunches of dried inflated follicles with yellow, shiny seeds inside.
<b>Service Berry</b> <i>(Amelanchier alnifolia)</i>			3-15'	Small to large shrub. Fall color more intense in sunnier sites. White flowers by mid summer followed by sweet purple berry-like fruits. Great for wildlife. Foliage is reddish, becoming dark blue-green in summer, turning brilliant red and gold in fall.
<b>Silk Tassel</b> <i>(Garrya elliptica)</i>			20'	Shrub, sprawling, evergreen, spicy-scented. Beautiful foliage and great for hedgerow or screening. Flowers are small, in clusters. Long-persistent hanging clusters of silky flowers in winter replaced by silky-wooly fruits. Attracts birds. Fixes nitrogen in soil.
<b>Evergreen Huckleberry</b> <i>(Vaccinium ovatum)</i>			4-10'	Bushy evergreen shrub with small shiny green leaves and pinkish white flowers. Does well in shade and provides food for wildlife. Blooms April to July.
<b>Western Red Cedar</b> <i>(Thuja plicata)</i>			100-230'	Large conifer with swooping branches and a strongly buttressed trunk. Reddish brown and fibrous bark. Grows well on wet sites.
<b>Nodding Onion</b> <i>(Allium cernuum)</i>			1-3'	Moist, neutral to alkaline soils. Perennial herb, all parts have an onion odor. Leafless stalk w/ pink or white flowers that nod toward the ground. Grow in clusters from bulbs.
<b>Deer Fern</b> <i>(Blechnum spicant)</i>			3'	Wet/moist soils. Year round good looks. Sterile leaves often pressed to ground; fertile leaves upright arising from center. Important winter food for deer in some areas.
<b>Paper Birch</b> <i>(Betula papyrifera)</i>			UP TO 100'	Deciduous tree. Provides food for some butterfly larvae and attracts insects which attract birds. Bark peeling in papery strips, white to copper-brown. Male and female catkins 1.5" long flowers before or with emerging leaves.
<b>Red Flowering Currant</b> <i>(Ribes sanguineum)</i>			3-10'	Upright, multi-stemmed shrub with showy clusters of deep pink flowers. Very attractive to hummingbirds and other pollinators. Blooms early; Feb- March.
<b>Red Osier Dogwood</b> <i>(Cornus stolonifera)</i>			15-20'	Spreading, thicket-forming shrub with white flower clusters. Bright red stems provide winter color. Important species for wildlife. Flowers April-June.
<b>Salal</b> <i>(Gaultheria shallon)</i>			3-7'	Creeping to erect shrub with hairy branching stems and dark leathery leaves. White bell-shaped flowers.
<b>Broadleaf Stonecrop</b> <i>(Sedum spathulifolium)</i>			GROUNDCOVER	Perennial, succulent herb silvery, blue-green and red clusters w/ bright yellow flowers in flat topped clusters atop leafy, flowering stems. Good as ground cover, in rock gardens and in rock walls. Flowers attract butterflies.
<b>Nootka Rose</b> <i>(Rosa nutkana)</i>			10-15'	Spindly shrub with large pink rose flowers. Provides wildlife with food and shelter. Blooms May-June.
