2018 NATIVE PLANT SALE: PLANT DESCRIPTIONS

SYMBOL KEY: MOISTURE WET = SATURATED SOIL  MOIST= DAMP ; WET SPONGE  DRY= NO WATER RETENTION  EXPOSURE SUN = 6+HOURS  PARTIAL= 3-6HOURS  SHADE=LESS THAN 3HOURS  .. 				
PLANT NAME	MOISTURE	EXPOSURE	MATURE SIZE	DESCRIPTION
QUAKING ASPEN <i>(Populus tremuloides)</i>			H: up to 60' W: 20-30'	Graceful, deciduous tree, readily reproduces from suckers. Rounded-ovate to heart shaped leaves characteristically flutter in the wind. Fall color is yellow & gold.
BUFFALOBERRY <i>(Shepherdia canadensis)</i>	 	 	H: 6-12' W: 6-12'	Deciduous, spreading shrub with bright red, juicy berry-like fruit. Edible but bitter. Likes well-drained or rocky soils. Can be planted as a hedgerow or in a wildlife garden. Birds enjoy the fruit.
REDSTEM CEANOTHUS <i>(Ceanothus sanguineus)</i>	 	 	H: 3-10' W: 3-10'	Erect, deciduous shrub with reddish or purplish bark. White, fluffy, scented flowers on reddish stalks. Blooms late spring to mid-summer. Likes dry, open sites. Attracts pollinators.
PACIFIC CRABAPPLE <i>(Malus fusca)</i>	 	 	H: up to 30' W: up to 40'	Small tree with showy white to pink fragrant blossoms & small, egg-shaped apples. Edible but tart. Red & Orange fall color. Important to birds & pollinators.
Red Flowering Currant <i>(Ribes sanguineum)</i>			H: 3-10' W: 4-10'	Upright, multi-stemmed shrub with showy clusters of deep pink flowers. Very attractive to hummingbirds and other pollinators. Blooms early; Feb- March.
Red Osier Dogwood <i>(Cornus stolonifera)</i>	 		H: 7-10' W: 8-10'	Spreading, thicket-forming shrub with white flower clusters. Bright red stems provide winter color. Important species for wildlife. Flowers April-June.
Blue Elderberry <i>(Sambucus nigra spp cerulea)</i>	 	 	H: 10-30' W: 8-20'	Deciduous shrub/small tree, multi-stemmed. Grows up to 18' wide. Tiny, creamy flowers in late spring to mid-summer. Edible, dark blue berries. Fairly drought tolerant. Good for wildlife and butterflies.
Indian Plum <i>(Oemleria cerasiformis)</i>	  	 	H: 5-15' W: 5-10'	Shrub or small tree, one of the first to flower in the spring. Flowers bloom very early, before leaves. Edible but bitter blueish-black fruits.
Douglas/Rocky Mt. Maple <i>(Acer glabrum)</i>	 		H: up to 30' W: 10-15'	Small tree with typical maple-shape leaf, wing-shaped fruits. Prefers more sun & drier soil than vine maples. Yellow fall color.
Mock Orange <i>(Philadelphus lewisii)</i>	  	 	H: 6-10' W: 6-10'	Erect, loosely branched deciduous shrub. Showy, fragrant white flowers bloom in numerous clusters.
Nootka Rose <i>(Rosa nutkana)</i>	 		H: 2-10' W: 3-6'	Spindly shrub with large pink rose flowers. Provides wildlife with food and shelter. Blooms May-June.
Shore Pine <i>(Pinus contorta v contorta)</i>	  		H: up to 100' W: 5-20'	Fast growing pine, compact and rounded, more open with age. Does well in rock gardens or containers. Highly adaptable.
Pacific Ninebark <i>(Physocarpus capitatus)</i>		 	H: 8-12' W: 4-7'	Erect to spreading shrub with dark green leaves and clusters of small white flowers in May/June. Brown, shredding bark. Grows in moist, nutrient rich soil.
Garry Oak <i>(Quercus garryana)</i>	 		H: 20-90' W: up to 30'	Beautiful, deciduous, heavy limbed oak tree when mature; often small and shrubby (especially in rocky, dry soil). Fall color is yellow/brown. Acorns edible. Slow-growing but magnificent tree.
Thinleaf Huckleberry <i>(Vaccinium membranaceum)</i>	 	 	H: 4- 6' W: 6'	Deciduous shrub with magenta to red fall color. Flowers yellow-pink; bloom from spring to early summer. Berries purple-red black. More sun=more fruit. Fruit has excellent flavor. Birds love the berries.
Salal <i>(Gaultheria shallon)</i>	 	 	H: 3-7' W: 1-5'	Creeping to erect evergreen shrub with hairy branching stems and dark leathery leaves. White bell-shaped flowers. Great for erosion control & hedgerows.
Oregon Stonecrop <i>(Sedum oreganum)</i>		 	H: 6" space 6-12"	Succulent, evergreen groundcover with small, yellowish clusters of flowers from early to late summer. Great for a butterfly or rock garden, between pavers or a stone wall.
Oak Fern <i>(Gymnocarpium dryopteris)</i>		 	H: 6-12" W: 12-18"	Deciduous fern, spreads from rhizomes forming a carpet. Excellent groundcover for shady gardens.
