SUN= 6+HOURS
  PARTIAL= 3-6HOURS
  = LESS THAN 3HOURS
 

| PLANT NAME | MOISTURE | EXPOSURE | APPROX SIZE* | PLANT CHARACTERISTICS |
|---|---|---|-----------------------|---|
| BUFFALOBERRY <i>(Shepherdia canadensis)</i> |  |  | H: 6-12' W: 6-12' | Dioecious, deciduous, spreading shrub with bright red, juicy berry-like fruit. Edible but bitter. Likes well-drained or rocky soils. Can be planted as a hedgerow or in a wildlife garden. Birds enjoy the fruit. |
| CEANOTHUS, RED STEM <i>(Ceanothus sanguineus)</i> |  |  | H: 3-10' W: 3-10' | Erect, deciduous shrub with reddish or purplish bark. White, fluffy, scented flowers on reddish stalks. Blooms late spring to mid-summer. Likes dry, open sites. Deep roots can aid in erosion control. Attracts pollinators. |
| CRANBERRY, AMERICAN <i>(Viburnum opulus americanum)</i> |  |  | H: 8-12' SPREADING | Semi-evergreen shrub. White to pink flowers in spring attract pollinators; bright red berries attract birds in fall & winter. Prefers good sun, well-drained, loamy soil and requires regular watering until established. |
| CURRENT, RED FLOWERING <i>(Ribes sanguineum)</i> |  |  | H: 3-10' W: 4-10' | Upright, multi-stemmed shrub with showy clusters of deep pink flowers. Very attractive to hummingbirds and other pollinators. Blooms early; Feb- March. |
| INDIAN PLUM <i>(Oemleria cerasiformis)</i> |  |  | H: 5-15' W: 5-10' | Shrub or small tree, one of the first to flower in the spring. Flowers bloom very early, before leaves. Edible but bitter bluish-black fruits. |
| MAPLE, DOUGLAS OR ROCKY MT <i>(Acer glabrum)</i> |  |  | H: 30' W: 10-15' | Small tree with typical maple-shape leaf, wing-shaped fruits. Prefers more sun & drier soil than vine maples. Yellow fall color. |
| MOCK ORANGE <i>(Philadelphus lewisii)</i> |  |  | H: 6-10' W: 6-10' | Erect, loosely branched deciduous shrub. Showy, fragrant white flowers bloom in numerous clusters. Can be planted in a mixed hedge or as a specimen plant. Attracts pollinators. |
| ROSE, NOOTKA <i>(Rosa nutkana)</i> |  |  | H: 2-10' W: 3-6' | Spindly shrub with large pink rose flowers. Provides wildlife with food and shelter. Blooms May-June. |
| SILK TASSEL <i>(Garrya elliptica)</i> |  |  | H: 8' W: 8' | Evergreen shrub or small tree, erect, dense with elliptical to oval, leathery, glossy leaves. May grow as tree up to 30' height. Dioecious plant that flowers in winter, with catkin-like clusters (longer in male plants). Fruit, in grape-like clusters, may be present through the summer if not eaten by birds. |
| SPIREA, DOUGLAS <i>(Spirea douglasii)</i> |  |  | H: 3-6' SPREADING | Bright, purplish-pink flowers. Can be aggressive in wetlands or stream-side areas. Great pollinator & provides habitat/cover for birds. |

*Approximate size: Estimated plant size, after 10 years growth when established under ideal growing conditions. This information is provided as a guide to plant selection and location.
